React Developer

Protojet
Fraser, MI
December 2020 - May 2021

- React/NextJS with TailwindCSS to build quoting application that calculated a quote price based on inputs
- Apollo GraphQL/Redux for state management, API data graphing, and caching.
- NextJS API functions for routing, authorization, and data fetching.
- Firebase Authentication.
- MongoDB for data persistence.
- Typescript for type checking, Jest for unit testing, Postman for e2e testing
- Created Custom Hooks for the email service and other utilities needed for the application.

Wharton Center for Performing Arts
East Lansing, MI
May 2019–April 2020

- Sold tickets to events showing at the Wharton Center
- Guided customers through our website
- Provided guests with information and any accommodations needed when they attend a show

Quality Assurance Representative

Protojet
Fraser, MI
June 2015–August 2017

- Ensured that the prototypes from the CNC press were properly trimmed, packaged, and shipped to partnered businesses
- Built computers and helped with IT and network management
